PHYSICAL CONSIDERATION

All passengers must be capable of standing for the duration of the flight, and enter and exit the basket unassisted. If there is any question regarding your physical health limitations, please consult your doctor and advise us of your concerns before confirming a booking. We will do all we can to accommodate prospective passengers. We consider it unsafe to fly when pregnant or any form of brittle bone disease. The pilot in charge of the flight must make the decision and has the right to ask you not to participate in this particular flight due to the wind conditions which may cause a bumpy landing.

CHILDREN:

Should be 1.200 meters tall to see over the basket. Children under 16 years of age must be accompanied by a legal guardian.

BASKET SIZES:

Basket Size For the comfort and safety of our passengers

All our baskets are double T shaped with the pilots cockpit in the center of the balloon. I will always try my best to place you and your partner on the same side of the balloon and not split you. Please be aware that when the pilot burns to maintained heat in the envelope, it is noisy so meaningful communication will have to take place on landing with a glass of sparkling wine in hand.

We do not fly small private flights with passengers in the same compartment as the pilot as we do not consider this a safe flight for paying passengers

Air to Air Africa fly 3 large commercial balloons which carry: -

6-8 (2-3 per compartment) this balloon is known as Daddy's Blue

10-12 (2-3 per compartment) this balloon is known as Rainbow

16-18 (4/5 per compartment) this balloon is known as Monster C Red
